Welcome to the FIRST TC Seoul

It is a great pleasure to welcome you to the FIRST TC Seoul.

I am Kilsoo Chun, the Chief of KrCERT/CC, the vice president of Korea Internet & Security Agency(KISA). KISA is a governmental organization that implements the Internet and cybersecurity policies and promotes the development of relevant industry sectors under the Ministry of Science, ICT and Future Planning in Korea.

Cybersecurity is no longer retained by any measure that an individual country or a defined group of countries decide to take. The stronger and effective collaboration at the global level is imperative in order to maintain the peaceful cyberspace. FIRST TC Seoul will be a good chance to seek methods for response to various cyber threats with our colleagues as well as get to know each other.

TC Seoul breaks into the two parts. The first one is a training for everyone in CSIRT and the second one is a plenary seminar to share the experiences on the various sectors.

November in Seoul is the autumn. It starts turning the color from green to red and yellow with cool temperature in everywhere. The autumn is a perfect weather to look around the country indeed. Come to Seoul for the FIRST TC Seoul and feel the beautiful fall in Seoul.

Chief of KrCERT/CC
Vice President of KISA
Kilsoo Chun

Korea
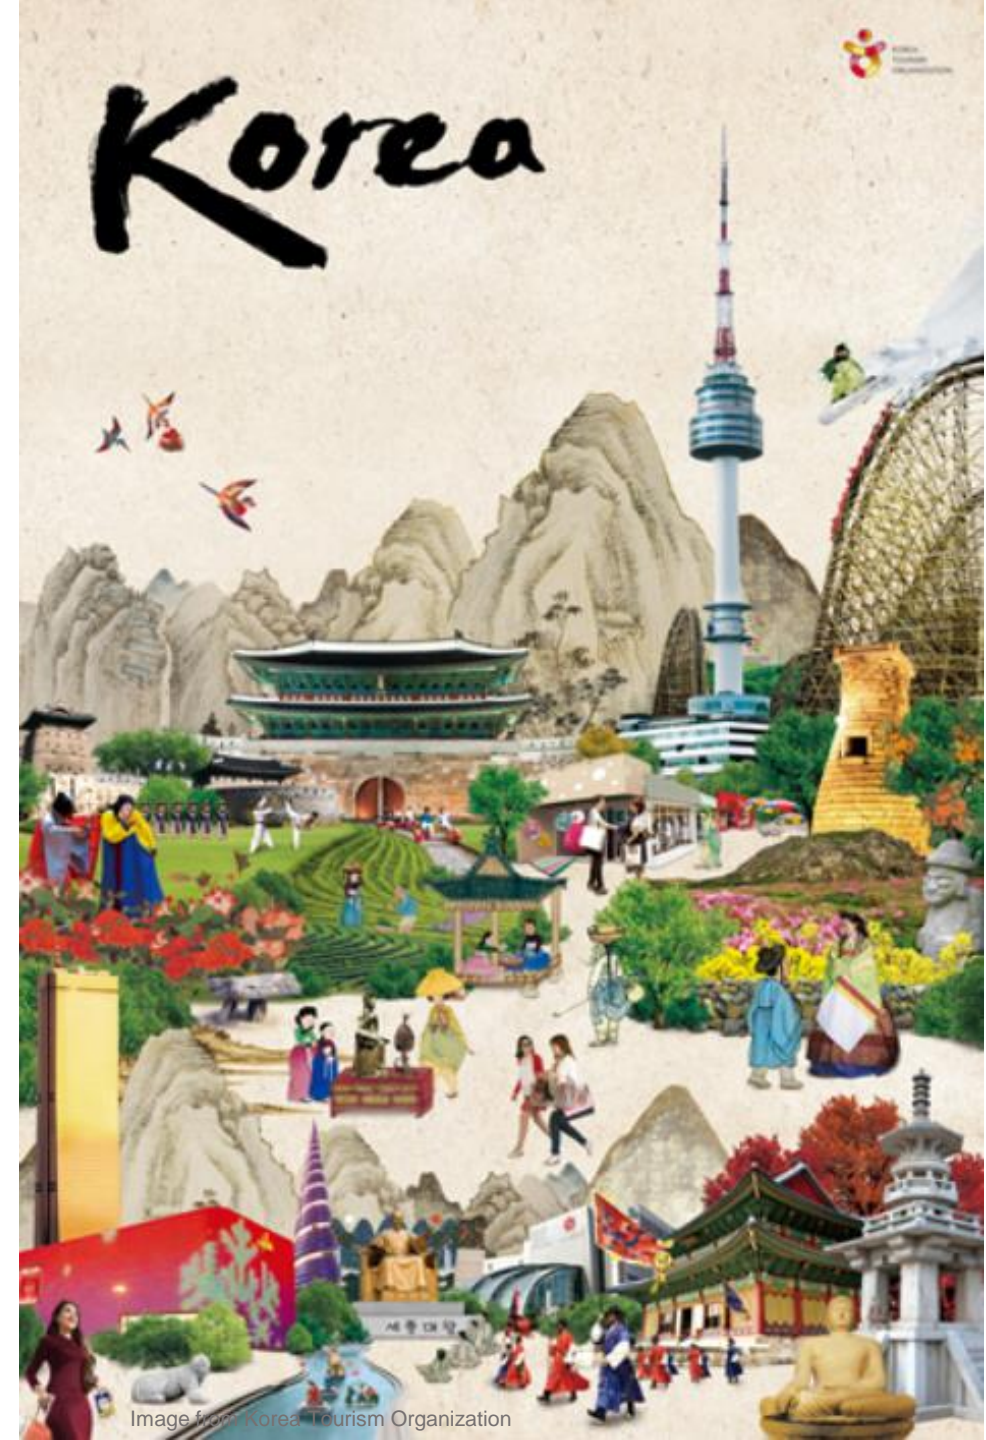

Forum of Incident Response and Security Teams

FIRST is the Forum of Incident Response and Security Teams. Established in 1990, FIRST is an international confederation of trusted computer incident response teams who cooperatively handle computer security incidents and promote incident prevention programs. FIRST promotes the creation and expansion of incident response teams and membership from organizations from around the world.
